at the Co-op store.
Food and drink to take away can be purchased

Finish of the walk
at the end of the lane or at the start and
Refreshments and toilet facilities are available
Core is needed in the Churchyard.
Hooker Hill is the only uphill incline.

Village Freshwater Round old
A circular walk

BETTY’S WALK

Is approximately 1.4 miles long

The Walk

Led by

BETTY that inspired us to produce this
all of her life. It was her memories of Old
Betty was born in 1923 and has lived in Freshwater
45 years ago.
Freshwater Central
Founder member of
joined the WI as a
Betty Copper, who
in honour of Mrs.
This walk is named

About Betty
Freshwater.

1. To complete our circular walk around Old Freshwater, go to the footpath signposts from here back to the car park. Continuing to walk through a circular walk around Old Freshwater. It is only a few hundred yards from here back to the car park.

2. At the top of the hill, we cross into Church Street. This footpath takes us out to Afton Road where we turn left to the "end of the line" car park standing on the bridge over the footpath. The bridge is for the protection of the Yar and the railway from the River. The old bridge was built in 1940 by the Western Yar. It is very narrow, and the footpath is only a few feet wide. It is very picturesque, and the view from the bridge is breathtaking.

3. From the footpath, we continue around the corner into Church Street. The church, St. Peter's, is on the left. It is a beautiful old church with a tower. Inside, there is a large organ and a beautiful stained glass window. The church is open to the public.

4. As we walk towards the church, we pass a small park where we can have a rest before continuing the walk.

5. Before we reach the church, we pass a small stream with a waterfall. The stream is very picturesque, and the water is crystal clear. It is a beautiful place to enjoy a picnic and watch the wildlife.

6. After crossing the old stone bridge, we will be turning a right at the next intersection. The footpath is very narrow, and we must be careful not to block the way for other walkers.

7. Before we reach the church, we pass a small park where we can have a rest before continuing the walk.

8. As we walk towards the church, we pass a small stream with a waterfall. The stream is very picturesque, and the water is crystal clear. It is a beautiful place to enjoy a picnic and watch the wildlife.

9. Before we reach the church, we pass a small park where we can have a rest before continuing the walk.

10. As we walk towards the church, we pass a small stream with a waterfall. The stream is very picturesque, and the water is crystal clear. It is a beautiful place to enjoy a picnic and watch the wildlife.
