

## Figuresheets' - Population statistics for the Isle of Wight

The following pages provide data sets that offer a breakdown of population numbers across the Isle of Wight. All of the information given in the following sheets has been extracted from data supplied by the Office for National Statistics (ONS).

The principal set of projections for population use a geographical area referred to as Lower Layer Super Output Areas (LSOAs). These were developed in conjunction with the 2001 Census and help to provide a level of consistency when comparing results over a number of different years. Two tables have been included using this format, with the results split across five age bands, with the second table also including the breakdown by male and female gender.

The third table offers an overview to the changes that have occurred in population between 2011 and 2012, which also identifies in the broadest possible terms the way in which each annual population estimate is arrived at.

A fourth table provides a breakdown of the overall population number by single years of age between 0 years and 90 plus years. This may be of some assistance where numbers for individuals in a single year, or range of ages is needed. However, the ONS itself identifies that there is an increased opportunity for inaccuracy when the estimations are taken down to this level and a degree of caution should be taken with how these figures are applied. (See also the notes overleaf.)

The final set of tables are projected numbers for people living in each of the current set of Electoral Wards, with numbers broken down across a range of age bands and by gender. There is also a summary breakdown which considers the numbers of people in the 16-64 age band only (working age).

A brief outline to each of the pages is given on the following page together with a link to the relevant webpage on the ONS website. Extracts taken from the Notes and Definitions provided by the ONS have also been included to accompany each of the datasets.

These notes are provided for reference by anyone who may be wishing to use the statistical information given, in any form of publication or advice, outlining guidance to the way the figures have been arrived at and how they may need to be applied.

### Terms and Conditions (per ONS guidance):

1. All material on the Office for National Statistics (ONS) website is subject to Crown Copyright protection unless otherwise indicated.
  2. Under the terms of the Open Government licence (OGL) and UK Government Licensing Framework (launched 30 September 2010) anyone wishing to use or re-use ONS material, whether commercially or privately, may do so freely without a specific application for a licence, subject to the conditions of the OGL and the Framework.

### [1. Mid-2011 Population Estimates for Lower Layer Super Output Areas by Broad Age and Gender](#)

These two tables show a breakdown of the Island population by Lower Layer Super Output Area (LSOA) for the Isle of Wight, numbers are grouped by 5 broad age bands for all persons and in a separate sheet split by gender. These figures are consistent with the published mid-2011 local authority population estimates.

*Lower Layer Super Output Areas (LSOAs) -*

LSOAs were built from groups of 2001 Census Output Areas (OAs) and designed to capture a geographic area with a minimum population of 1,000 people and a mean or average population of 1,500 people. There are 34,378 LSOAs across England and Wales, with a total of 89 applied across the Isle of Wight.

#### **Notes and Definitions (per ONS guidance):**

1. The figures are consistent with the published mid-2011 local authority population estimates.
2. It is ONS policy to publish population estimates rounded to at least the nearest hundred persons. These estimates are provided to enable and encourage further calculations and analysis. Note: Since these are estimates they cannot be guaranteed to be as exact as the level of detail implied by unit level data. Data should be rounded to the nearest 100 if quoted in any publication, documentation or similar.
3. The estimated resident population of an area includes all people who usually live there, whatever their nationality. People arriving into an area from outside the UK are only included in the population estimates if their total stay in the UK is for 12 months or more. Visitors and short term migrants (those who enter the UK for 3 to 12 months for certain purposes) would not have been included. Similarly people who leave the UK are only excluded from the population estimates if they remain outside the UK for 12 months or more. Members of UK and non-UK armed forces stationed in the UK are included in the population and UK forces stationed outside the UK are excluded. Students are taken to be resident at their term time address.

### [2. Mid-2012 Population estimates: components of population change for local authorities in the United Kingdom: estimated resident population.](#)

#### **Notes and Definitions**

1. The estimated resident population of an area includes all people who usually live there, whatever their nationality. People arriving into an area from outside the UK are only included in the population estimates if their total stay in the UK is 12 months or more. Visitors and short term migrants (those who enter the UK for 3 to 12 months for certain purposes) are not included. Similarly, people who leave the UK are only excluded from the population estimates if they remain outside the UK for 12 months or more. This is consistent with the United Nations recommended definition of an international long-term migrant. Members of UK and non-UK armed forces stationed in the UK are included in the population and UK forces stationed outside the UK are excluded. Students are taken to be resident at their term time address.
2. At a subnational level, the population estimates reflect boundaries as of the reference year.
3. Figures may not add due to rounding.

### [3. Mid-2012 Population Estimates: Single Year of age and gender for local authorities in the United Kingdom: estimated resident population.](#)

This sheet provides an estimation of population by single year age groups, with the total numbers broken down into male and female groupings and may be useful where an estimation of numbers within specific age bands or years is needed. (See also Notes and Definitions below.)

Date originally supplied: 30 June 2011.

#### **Notes and Definitions (per ONS guidance):**

1. It is ONS policy to publish population estimates rounded to at least the nearest hundred persons. These estimates are provided to enable and encourage further calculations and analysis. Note: Since these are estimates they cannot be guaranteed to be as exact as the level of detail implied by unit level data. Data should be rounded to the nearest 100 if quoted in any publication, documentation or similar.
2. The estimated resident population of an area includes all people who usually live there, whatever their nationality. People arriving into an area from outside the UK are only included in the population estimates if their total stay in the UK is for 12 months or more. Visitors and short term migrants (those who enter the UK for 3 to 12 months for certain purposes) would not have been included. Similarly people who leave the UK are only excluded from the population estimates if they remain outside the UK for 12 months or more. Members of UK and non-UK armed forces stationed in the UK are included in the population and UK forces stationed outside the UK are excluded. Students are taken to be resident at their term time address.
3. At a subnational level such as the Isle of Wight, the population estimates reflect boundaries that were in place on 1 April 2010.
4. Local estimates are now calculated by single year of age, but as a result these figures may prove to be less reliable and it is advised that single year of age data for local areas should be aggregated to at least five-year age groupings for use in further calculations, onwards circulation, or for presentation purposes. (Splitting into 0 year olds and 1-4 year olds would be an acceptable exception).

### [4. 2011 Ward Population Estimates for England and Wales, mid-2011](#)

For the purpose of this publication all electoral wards, electoral divisions and Isles of Scilly parishes are referred to as electoral wards. In particular, the data is provided for 2011 electoral wards, those that were operational as at 31 December 2011

#### **Notes and Definitions**

1. These figures are consistent with the published mid-2011 local authority and Lower Layer Super Output Area population estimates.
2. Estimates for mid-2011 are based on aggregations of whole mid-2011 Output Area (OA) estimates. OA boundaries are not an exact fit (non-coterminous) for parliamentary constituency boundaries and therefore are allocated using a best-fit approach.
3. It is ONS policy to publish population estimates rounded to at least the nearest hundred persons. These unit-level estimates are provided to enable and encourage further calculations and analysis. However, the estimates cannot be guaranteed to be as exact as the level of detail implied by unit-level data. We request that data are rounded to the nearest 100 if quoted in any publication, documentation or similar
4. These estimates are experimental statistics as they have not yet been assessed against the quality standards required for National Statistics. Feedback over the quality of these estimates is welcome (see contact details below).
5. The estimated resident population of an area includes all people who usually live there, whatever their nationality. People arriving into an area from outside the UK are only included in the population estimates if their total stay in the UK is 12 months or more. Visitors and short term migrants (those who enter the UK for 3 to 12 months for certain purposes) are not included. Similarly, people who leave the UK are only excluded from the population estimates if they remain outside the UK for 12 months or more. This is consistent with the United Nations recommended definition of an international long-term migrant. Members of UK and non-UK armed forces stationed in the UK are included in the population and UK forces stationed outside the UK are excluded. Students are taken to be resident at their term time address.
